

TABLE OF CONTENTS

Introduction	9
BASICS	11
System characteristics	13
Standards	15
FIRST STEPS	31
Starting	33
Installation on hard disk	34
Post-installation activities	49
Installation program.....	49
Foreign languages in the system	50
Hard disk drive larger than 4 GB	57
Untypical disk controller	74
WORKBENCH	77
Basic operations on windows and icons.....	79
Window display mode	85
Icon properties	89
Other operations	96
Workbench screen	99
Basic desktop settings	100
Facilities	105
System Clipboard	106
OPERATIONAL MEMORY	107
Memory organization	109
Ram Disk	110
SYSTEM DRIVE	113
"SYS:" device	115
Structure of data	115

Environment	120
Temporary files	120
DEVICES	121
Physical and logical devices	123
Device drivers	124
Modifying device drivers	127
Multiple devices in one file	131
FONTS	133
Types of the fonts	135
Installing new fonts	136
Conversion of vector fonts	139
Changing the size of vector fonts	140
TrueType fonts	141
Diacritic marks	143
AmigaPL standard	144
Keyboard map settings	144
ISO-8859-2 standard	146
System Fonts settings	147
Fonts conversion	149
"ReqTools" library	151
Running problems	157
"TransFont"	159
"FixFonts"	163
TEXTS	165
Text Viewers	167
System text editor	172
DISPLAY MODES	177
Display mode settings	180
Changing the monitor driver	182

Overscan mode settings	182
Various monitor drivers	184
Display selection window	186
New display modes	187
Color palette settings	188
Managing color palette.....	190
ICONS	193
MagicWB	195
New Icons	203
"Class Act" package	204
Icon editing	215
Icon type settings	219
Using the Clipboard	219
Other operations on graphics	220
Disk operations.....	221
Saving settings	222
"Iconian" program	222
Drawing tools	225
Resizing icon.....	226
Graphics operations.....	226
Changing the color of the icon	228
Text operations	229
Clipboard operations	230
Changing the display mode.....	231
Other disk operations.....	231
Multiple icons at once.....	232
Default icons.....	233
DATA FORMATS	235
Datatypes	237
Installing new datatypes	238
Special requirements.....	240

Data transfer	241
MS-DOS drives	242
FAT file systems	244
Macintosh disks	248
NTFS file system	249
EXT file systems	250
Other file systems.....	251
"Non-DOS" drives	254
"WHDLoad" program.....	255
Loading data to memory.....	262
Changing the display mode.....	263
Changing the quit or restart key	263
Memory usage control	264
Memory protection.....	264
Support for processor caches	264
Extended disk format	265
Virtual drives	266
Converting the characters.....	271
LOCALIZATION	273
OPTICAL DRIVES	277
Automatic driver installation	279
Manual driver installation.....	281
Support for DVD	282
File systems	285
PRINTERS	287
Printer driver.....	289
Printing in text mode	290
National characters printing	291
Graphics printout	292

Printing in PostScript	295
Units of measure.....	298
Additional functions	299
Drivers outside the system	301
Print managers	302
STARTING SECTOR.....	303
Kickstart	305
Bootblock	306
Rigid Disk Block	309
Startup sequence	313
Boot Menu	314
Fault diagnosis	319
Custom floppy disk	321
Kickstart update.....	323
PROTECTION	327
SYSTEM EXTENSIONS	339
User interface.....	341
Pull-down menu	349
Support for logical devices.....	355
Commodities	356
System components for faster CPUs	363
New installation program	365
AMIGA DOS	367
Viewing directory contents	373
Viewing the contents of the files	383
Creating new files and directories.....	386
Renaming files and directories.....	388
Copying and moving data	389
Deleting files and directories	393

Merging files	395
Changing Attributes of Files and Directories.....	395
Changing the date and time of creation or modification	399
Adding comments	400
Sorting the contents of text files	401
Searching text files	402
Running programs	406
Changing the prompt	407
Checking file version	408
Create logical devices	411
Formatting disks.....	415
Renaming drives.....	417
Automatic boot disks.....	418
Copying floppies	419
Disk security	421
"Mounting" of devices.....	423
Mathematical operations.....	426
Logical functions	427
Viewing information about a computer	428
Operations on processes.....	433
System clock	438
Loading the Workbench	439
Updating system settings	440
Fonts and keyboard maps.....	441
Overwriting command names	442
Resident commands	444
Other commands for easy work.....	445
Using the Clipboard	448
System patches	449
Datatypes support	451
Updating the removable drive status.....	451
Support for tape drive (streamer)	452

Environmental variables	453
Creating AmigaDOS scripts	457
AREXX	465
The first ARExx script.....	468
Variables	470
Operators	471
Commands	473
Loops	474
Conditional commands	475
Control commands	476
Operations on text strings.....	478
Downloading and writing data	486
Numbers format.....	489
Subroutines	490
Using AmigaDOS commands.....	492
System date	492
Error messages	493
Ending.....	500
